PROFILE SUMMARY

Dedicated Computer Engineer with comprehensive full-stack development experience spanning front-end and back-end technologies. Proven track record in web development using HTML, CSS, PHP, and SQL, complemented by practical internship experience at leading tech companies. Strong analytical skills demonstrated through innovative EEG-based machine learning projects. Seeking to leverage technical expertise and diverse experience in accounts management to contribute to dynamic software development teams.

EDUCATION

2020 - 2024

UNIVERSITY OF ENGINEERING AND TECHNOLOGY (UET), TAXILA

- Bachelor of Science in Computer Engineering

2019 - 2020

PUNJAB GROUP OF COLLEGES

- Intermediate in Pre-Engineering

TECHNICAL SKILLS

- HTML5, CSS3, JavaScript
- PHP (Server-side scripting)
- SQL (Database management)
- Microsoft Excel (Advanced)
- Google Sheets
- Financial data management
- Accounts management systems

ADDITIONAL STRENGTHS

- Problem-Solving
- Adaptability
- Communication
- Continuous Learning

WORK EXPERIENCE

Capriventures (PITB-funded initiative under NEP-NICS)

INTERNSHIP IN HTML/CSS (FRONT-END) 2023(JUN)-2023(AUG)

- Designed and developed responsive website front-end components using HTML, CSS, and JavaScript
- Implemented interactive navigation menus and user-friendly forms
- Ensured cross-browser compatibility across multiple platforms and devices
- Optimized layouts for enhanced performance and improved user experience

AGROVISE 2025 - 2026

SALES AND Accounts Manager

- Managed financial records and accounts using Excel and specialized software
- Processed sales transactions and maintained client account databases
- Generated financial reports and performed data analysis for business insights
- Ensured compliance with accounting standards and company policies

Hoboetech Pvt. Ltd 2026-Current

Back-end Development Intern

- • Developing server-side applications using PHP and SQL
- • Designing and implementing database schemas and queries
- • Optimizing backend performance and ensuring data security

PROJECTS

EEG-Based Advertisement Re Prediction System | Final Year Group Project:

• Objective: Developed a machine learning model to predict consumer responses to advertisements using EEG brainwave data

• Implementation:

- Collected and processed brainwave data from participants viewing 50-60 second advertisements
- Trained predictive models using EEG responses correlated with user ratings (1-10 scale)
- Impact: Created an innovative solution for market research and advertising effectiveness analysis
- Skills: Data science, signal processing, machine learning, research methodology
