PROFILE SUMMARY

Dedicated Computer Engineer with comprehensive full-stack development experience spanning front-end and back-end technologies. Proven track record in web development using in core PHP —front-end, back-end, and databases. Independently built and shipped two complete. PHP/MySQL applications, including a business ERP and a food ordering platform with live delivery tracking. Front-end and back-end internship experience, plus an EEG-based machine learning final year project. Seeking to leverage technical expertise and diverse experience in accounts management to contribute to dynamic software development teams.

EDUCATION

2020 - 2024

UNIVERSITY OF ENGINEERING AND TECHNOLOGY (UET), TAXILA

- Bachelor of Science in Computer Engineering

2019 - 2020

PUNJAB GROUP OF COLLEGES

- Intermediate in Pre-Engineering

TECHNICAL SKILLS

- HTML5, CSS3, JavaScript
- Core PHP (Server-side scripting)
- SQL (Database management)
- Microsoft Excel (Advanced)
- Google Sheets
- Financial data management
- Accounts management systems
- MySQL (Schema design & queries)
- Website management & maintenance

ADDITIONAL STRENGTHS

- Problem-Solving
- Adaptability
- Communication
- Continuous Learning

WORK EXPERIENCE

Capriventures (PITB-funded initiative under NEP-NICS)

INTERNSHIP IN HTML/CSS (FRONT-END) 2023(JUN)-2023(AUG)

- Designed and developed responsive website front-end components using HTML, CSS, and JavaScript
- Implemented interactive navigation menus and user-friendly forms
- Ensured cross-browser compatibility across multiple platforms and devices
- Optimized layouts for enhanced performance and improved user experience

AGROVISE

SALES AND Accounts Manager 2025 - 2026

- Managed financial records and accounts using Excel and specialized software
- Processed sales transactions and maintained client account databases
- Generated financial reports and performed data analysis for business insights
- Ensured compliance with accounting standards and company policies

Hoboetech Pvt. Ltd

Back-end Development Intern 2026(FEB)-2026(JUN)

- Developed server-side applications using PHP and SQL
- Designed and implemented database schemas and queries
- Optimized backend performance and ensured data security

Aceturbo uk

SoftwareDeveloper(Remote) 2026(JUN)-Current

- Developing and maintaining the company's websites end to end using core PHP
- Building responsive front-end layouts, templates, and interface improvements
- Implementing back-end features, server-side logic, and third-party integrations
- Managing MySQL databases including schema design, queries, and data integrity
- Working full-time remotely from Lahore with a UK-based team

PROJECTS

EEG-Based Advertisement Re Prediction System | Final Year Group Project:

• Objective: Developed a machine learning model to predict consumer responses to advertisements using EEG brainwave data

Implementation:

- Collected and processed brainwave data from participants viewing 50-60 second advertisements
- Trained predictive models using EEG responses correlated with user ratings (1-10 scale)
- Impact: Created an innovative solution for market research and advertising effectiveness analysis
- Skills: Data science, signal processing, machine learning, research methodology

AGROVISE — BUSINESS WEBSITE & ADMIN ERP | Personal Project:

- Built a full-stack PHP/MySQL system end to end: a public product catalog for an agriculture products business, plus a complete admin ERP behind it.
- Developed purchasing, stock lots, packing, invoicing, sales policies, payments, and banking modules, alongside clients, vendors, employees, ledgers, and vehicles
- Implemented role-based access control with per-module permissions and an expense-claim approval to payment lifecycle
- Secured throughout using parameterized PDO queries, CSRF-verified POST requests, and content-verified file uploads
- Stack: PHP, MySQL, PDO, HTML5, CSS3, JavaScript, Apache

LAHORE HOME FOOD — ONLINE ORDERING & DELIVERY PLATFORM | Personal Project:

- Developed a single-restaurant ordering platform front to back: menu, basket, checkout, payments, live delivery tracking, and a kitchen admin panel.
- Implemented four payment paths — cash on delivery, bank transfer, JazzCash, and Easypaisa — using signed payment gateway payloads.
- Built a separate rider application with shifts, job claiming, and order tracking.
- Stack: PHP 8.3, MySQL 8, PDO, JavaScript, Leaflet, PWA, Service Worker
-
